

About This Dashboard

- This dashboard analyzes player performance in the FA Women's Super League 2023/24 season.
- Built on StatsBomb open event data (~495,000 events, 132 matches).
- Transformed into a star schema with Python and model in Power BI.
- Full pipeline, data and methodology: github.com/molendaluisa/data-analytics-jci.
- Data © StatsBomb, used with attribution under their open data licence.

This dashboard attempts to answer:

1. Who are the league's top performers on a per-90 basis (goals, assists, xG, key passes)?
2. Which players over- or under-perform their expected goals (xG)?
3. What does an individual player's complete profile look like? (drillthrough)
4. What would a player's goal tally be under different finishing rates? (what-if)
5. Where do goals come from — by team, position, and possession origin? (root cause)

Metrics Definitions can be found at the Appendix page

Conversion Rate Applied

Goal tallies at the selected rate (min. 450 minutes)

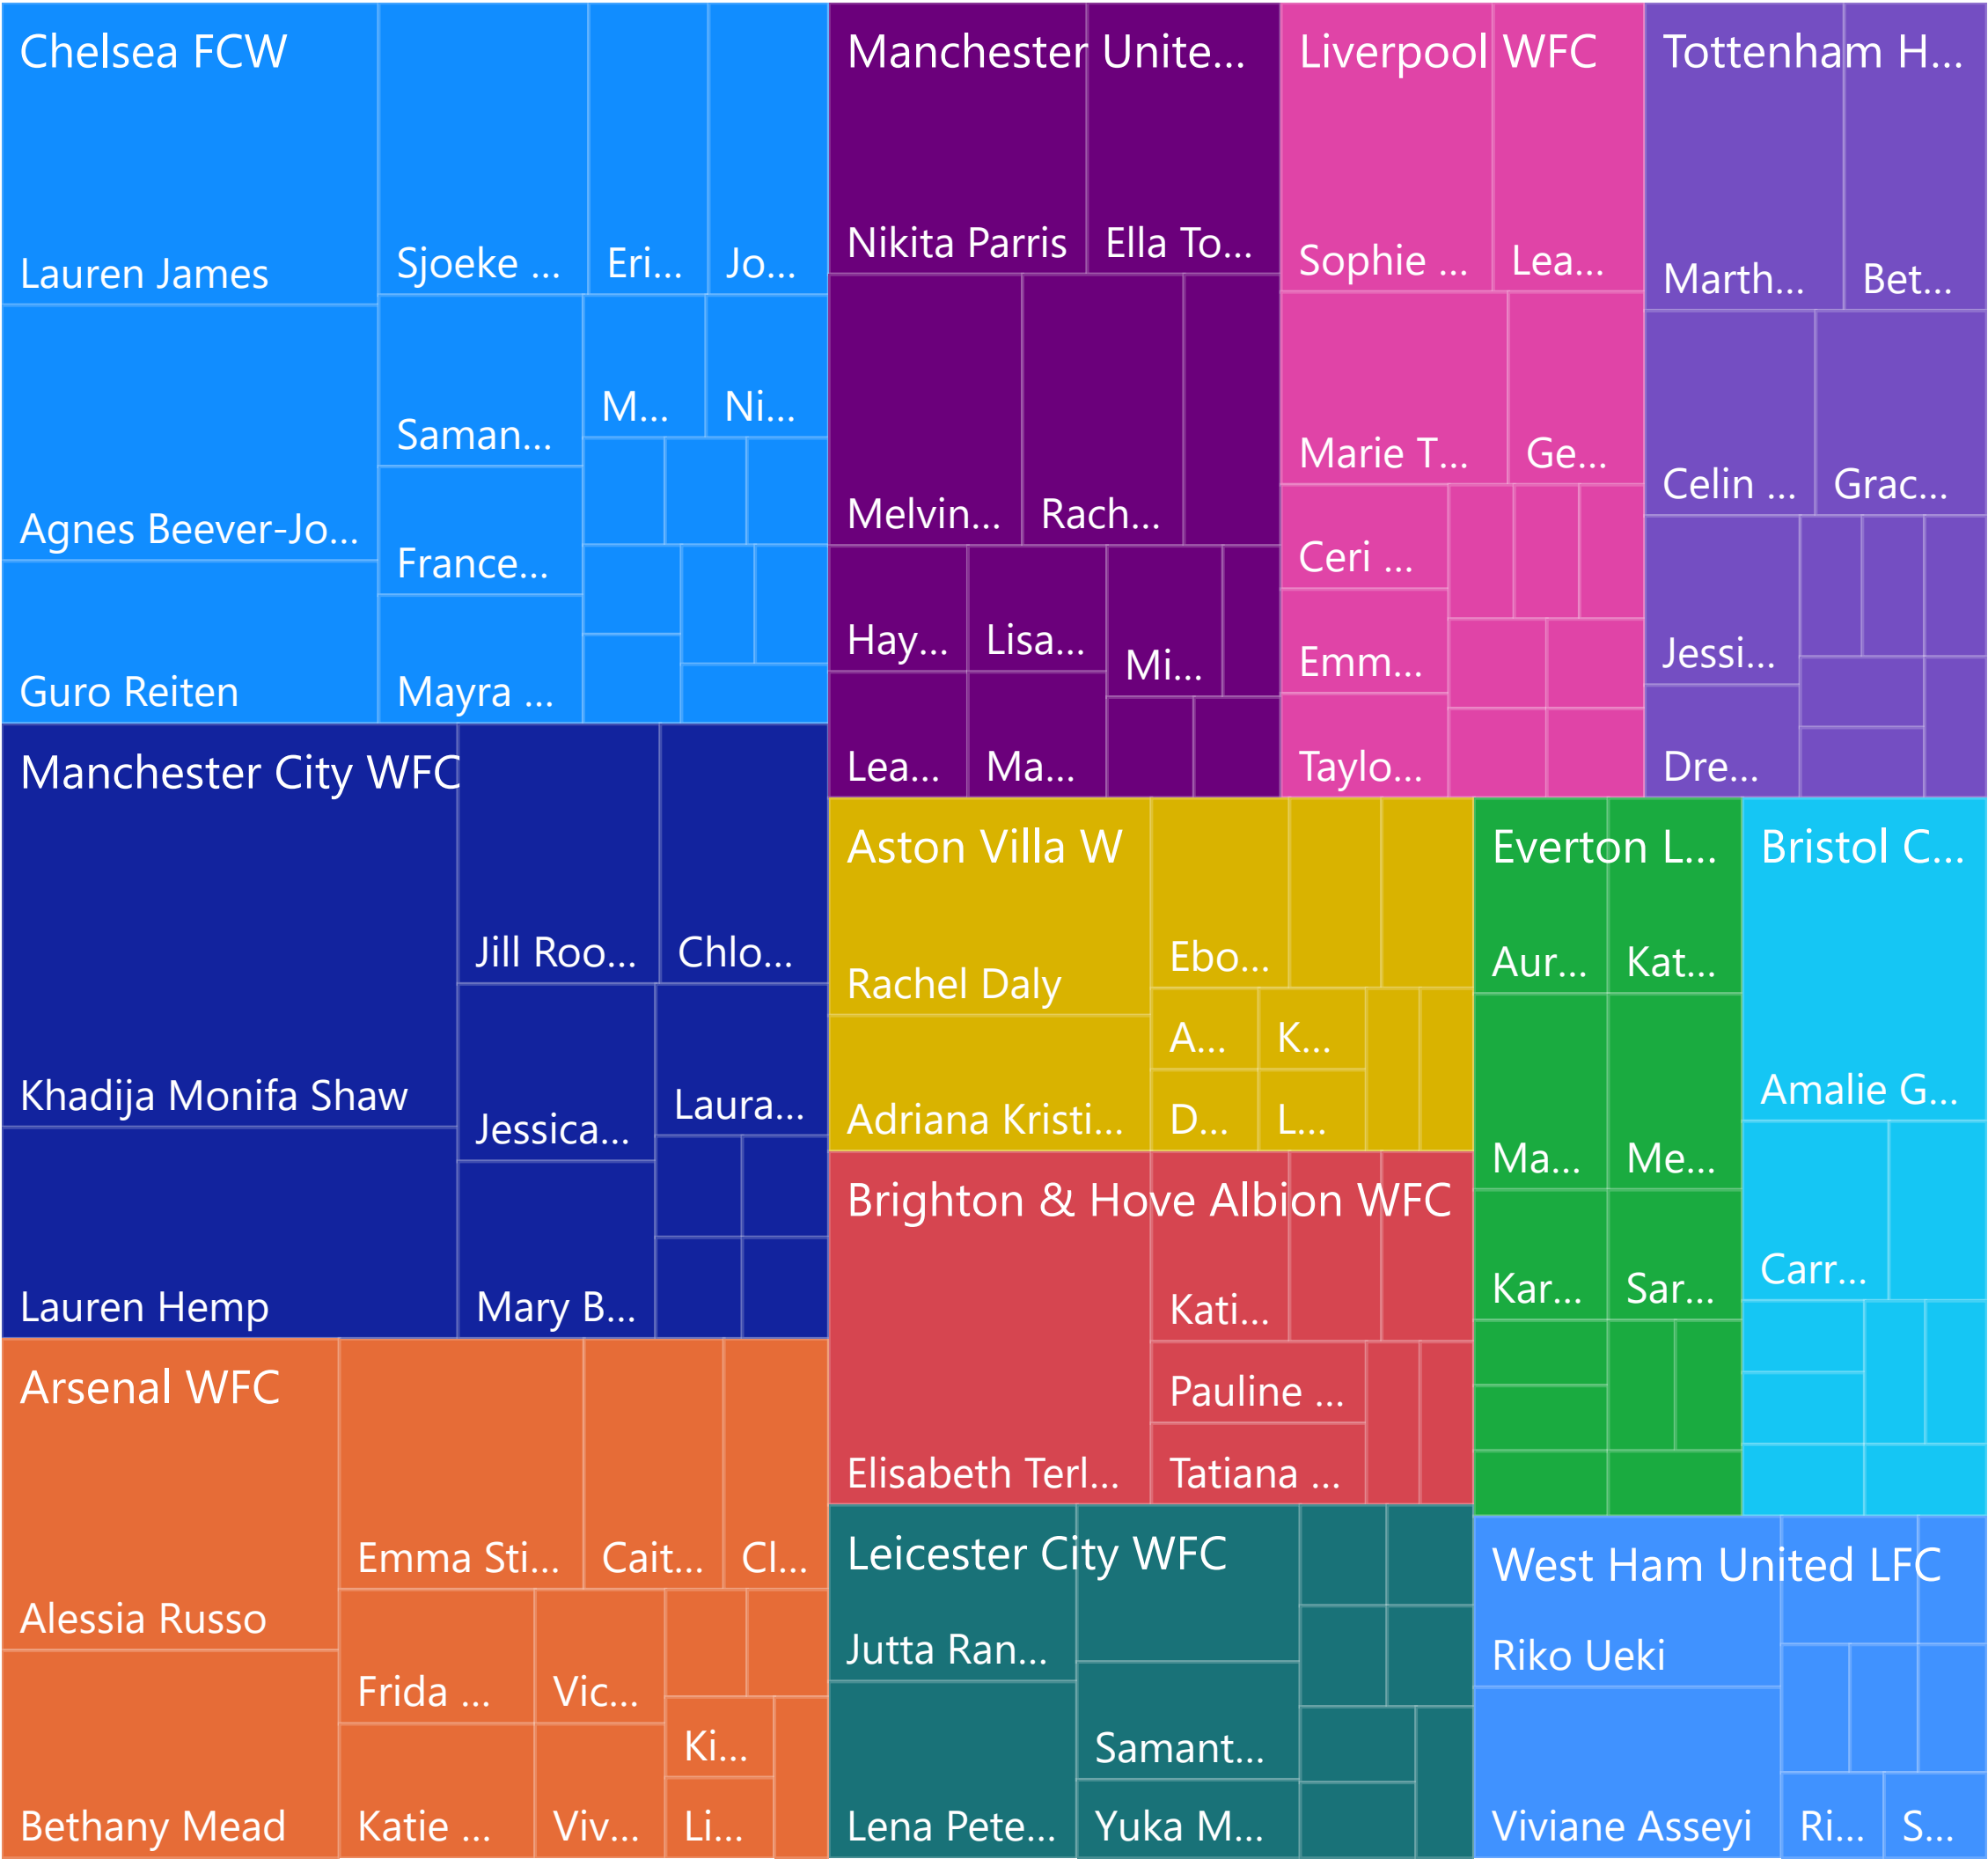

Player	Team	Total NP Goals	NP Conversion %	Simulated Goals	Goal Delta (Simulated)
Chloe Kelly	Manchester City WFC	4	0.06	14	10.00
Viviane Asseyi	West Ham United LFC	3	0.05	12	9.40
Geyse da Silva Ferreira	Manchester United W	1	0.02	8	7.20
Rachel Daly	Aston Villa W	6	0.09	13	7.00
Riko Ueki	West Ham United LFC	6	0.09	13	6.80
Caitlin Jade Foord	Arsenal WFC	4	0.08	10	5.80
Jutta Rantala	Leicester City WFC	5	0.09	11	5.80
Frida Maanum	Arsenal WFC	3	0.07	8	5.20
Lucía García Córdoba	Manchester United W	3	0.08	8	5.00
Alessia Russo	Arsenal WFC	11	0.14	16	4.60
Erin Cuthbert	Chelsea FCW	4	0.09	9	4.60
Kenza Dali	Aston Villa W	1	0.04	5	4.40
Kirsty Hanson	Aston Villa W	0	0.00	4	4.40
Ceri Holland	Liverpool WFC	2	0.06	6	4.20
Grace Clinton	Tottenham Hotspur Women	4	0.10	8	4.20
Aileen Whelan	Leicester City WFC	1	0.04	5	4.00
Missy Bo Kearns	Liverpool WFC	1	0.04	5	3.60
Sophie Roman Haug	Liverpool WFC	7	0.13	10	3.40
Total		385	0.12	662	277.20

Simulation = non-penalty shots × selected conversion rate. Assumes shot volume and quality unchanged.

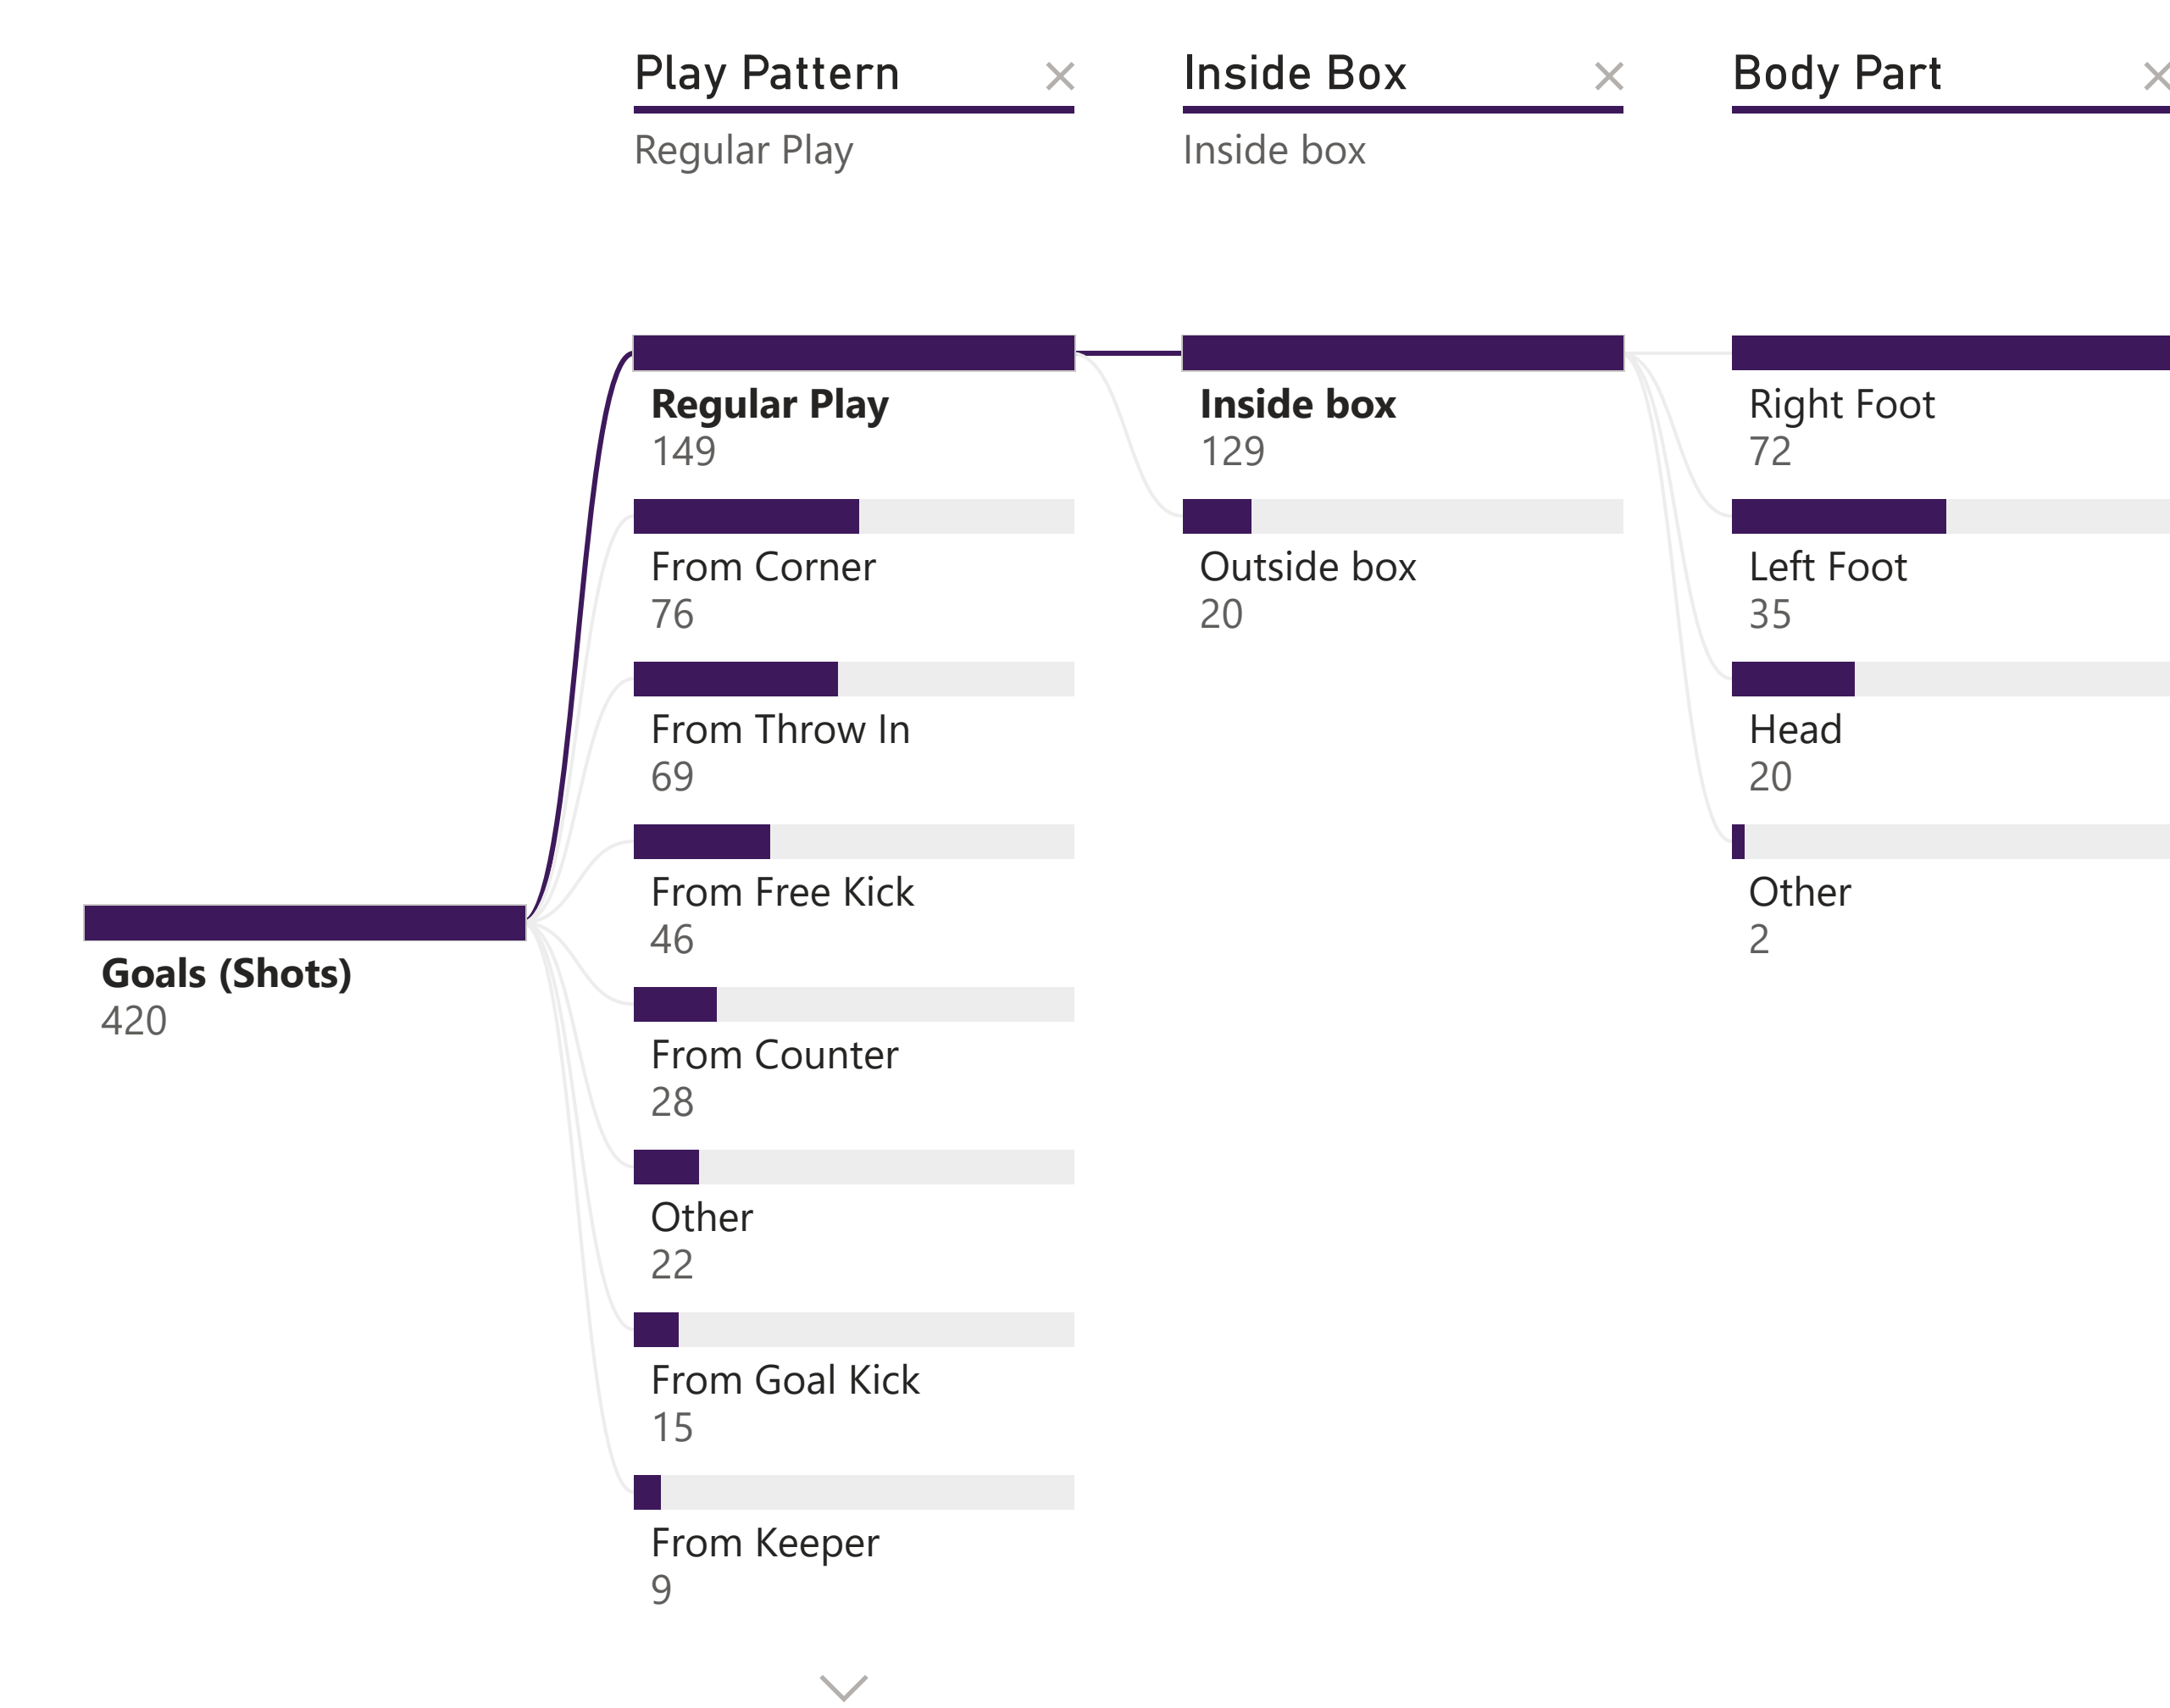

WSL 2023/24: Where Do Goals Come From?

Goals by Team and Player

Goals by Possession Origin

Metrics Definitions

- **Assists per 90:** Assists scaled to a per-full-match rate; shown only for players with 450+ minutes to avoid small-sample distortion.
- **G minus xG:** Non-penalty goals scored minus non-penalty expected goals: positive = finishing above what the chances warranted, negative = below.
- **Goal Delta (Simulated):** The gap between a player's simulated goal tally at the selected conversion rate and her actual non-penalty goals.
- **Goals (Shots):** Goal count computed from the shot-level table; used in shot-based visuals so it can be sliced by shot attributes like possession origin.
- **Goals per 90:** Goals scaled to a per-full-match rate (min. 450 minutes), separating productivity from playing time.
- **Goals per 90 (Position Avg):** The pooled goals-per-90 of *all* players in the same position group league-wide, used as the comparison baseline on player profiles.
- **Key Passes per 90:** Passes leading directly to a teammate's shot, per full match played (min. 450 minutes).
- **NP Conversion %:** Share of non-penalty shots that became goals; penalties excluded from both sides as they distort finishing comparisons.
- **np xG per 90:** Non-penalty expected goals per full match played (min. 450 minutes): the volume and quality of chances a player gets, independent of finishing.
- **Pass Completion %:** Share of attempted passes that reached a teammate.
- **Progressive Actions per 90:** Completed passes and carries moving the ball ≥ 15 yards toward the opponent's goal, per full match played (min. 450 minutes).
- **Simulated Goals:** A player's non-penalty shots multiplied by the user-selected conversion rate; assumes shot volume and quality unchanged.
- **Total Assists / Total Goals / Total Minutes:** Season totals of assists, goals, and real on-pitch minutes (including stoppage time) within the current filter.
- **Total NP Goals:** Season total of non-penalty goals.
- **Total np xG:** Season total of non-penalty expected goals: what a typical finisher would score from the same chances, penalties excluded.
- **Total xG:** Season total of expected goals including penalties.
